

Launch of Trial Project to Take Domestic Flights After Antigen Testing

**~ One-stop service to reserve air tickets and request antigen tests for safe
return to one's hometown ~**

- **“Safe return to hometown while preventing the spread of infection” by receiving pre-departure antigen tests**
- **Target routes for this trial project are flights serving Miyazaki and Amami from Kansai Airport between November 20th and December 19th.**
- **Cost to test recipients under this trial project is ¥3,000 (excluding tax).**

Peach Aviation Limited (hereafter, “Peach,” Representative Director and CEO: Takeaki Mori) is to begin implementing a “post-antigen testing domestic flight trial project” (hereafter, “this Project”) that enables domestic flights to be taken after passing a pre-boarding antigen test.

This Project will be implemented with the support and cooperation of the Association to Promote the Kansai International Airport Overall Plan, which is comprised of autonomous bodies and economic organizations, etc. in Kansai (secretariat: Osaka Prefectural Government), Miyazaki and Kagoshima prefectures, SRL, Inc. (hereafter, the Partner Testing Company), and Utsubo Garden Clinic (hereafter, the Partner Clinic).

Despite domestic leisure demand gradually recovering thanks to the “GoTo Travel Campaign,” recovery in trips back to one's hometown is weak, partially because of concerns about triggering an outbreak of infection, although it is assumed there is a significant need to travel to help with nursing care, etc. As a result of a survey conducted amongst Kansai residents with connections to the Amami region in Kagoshima prefecture, about 70% of respondents said that they voluntarily self-banned any return to their hometown this summer out of concern for spreading the coronavirus among local residents, and they also confirmed that they intend to postpone returning to their hometowns if safety cannot be ensured under the reinforced countermeasures against the Covid-19 infection (due to concerns about receiving critical looks at the yearend/New Year holiday period).

In response, Peach is to implement this Project on routes that have few alternative means of transport besides flights, although demand to return to one's hometown is high, prior to the peak of the hometown return period at the yearend/New Year.

The target period and routes for this project are initially two routes, namely flights serving Miyazaki and Amami from Kansai Airport from November 20th to December 19th. Based on the trial project's results, we will consider increasing the number of target routes and passengers by inviting additional partner clinics for this project to bolster the number of inspections, and will look into the possibility of development near airports in other regions.

We will also proactively call on everyone who requests an antigen test under this Project to take all possible measures to minimize the risk of infection before departure after the test, and while traveling without letting down their guard due to the test results in order to realize a “safe hometown return without causing new infections” as per the purport of this project.

Together with our customers, Peach will contribute to the recovery of the Japanese economy by building new travel styles around the theme of “Bridging your Sky,” while continuing its safe operations and thorough measures to prevent the Covid-19 infection.

*Japanese only

< Travel procedures >

- 1) Check the availability and schedule of your requested flight on the Peach website and the reservation site of the partner clinic.
- 2) Reserve air tickets for eligible fares on the Peach website.
- 3) Request an antigen test via the “New Coronavirus Antigen Test Support Option” on the special page of the Peach website and apply on the condition not to board if the test proves positive.
- 4) Reserve a medical examination via the reservation site of the partner clinic. (Air ticket reservation number is required.)
- 5) Take the antigen test at the partner clinic at least before 5 days from departure.
- 6) Explanation about the test results is provided at the partner clinic if negative. (Requires another visit to the clinic.)

A negative test result certificate will be issued, permitting the recipient to travel.

If the test results are positive, the partner clinic will advise the person by telephone, the public health center will be notified by the partner clinic, and the public health center’s instructions must then be followed.

If tested positive, one cannot board the reserved flight, and the flight reservation will be changed or canceled.

<Outline of the “Post-antigen test domestic flight trial project”>

- Target period: Flights departing from November 20th to December 19th, 2020
- Target routes: Two routes serving Miyazaki and Amami from Osaka (Kansai)
- Target passengers: Applicants who have booked with changeable Value Peach or Prime Peach fares
(Initially, up to five people per day)
- Medical examination: Diagnosis based on tests conducted by the partner testing company will be received following a medical examination at the partner clinic five days before departure.*1
- Cost: The cost of this project will be borne by the Association to Promote the Kansai International Airport Overall Plan, Miyazaki and Kagoshima prefectures – which are the destinations for the routes targeted by the trial project, Peach, and those who request the antigen test. The amount to be paid by those requesting a test is ¥3,000 (excluding tax), which is to be paid when visiting the partner clinic.

- Others: After reserving one's air tickets, in conjunction with requesting the antigen test, if the test result is positive, one must follow the instructions of the public health center, and one must also submit a written agreement not to board the flight (reservations will be changed), etc.

*1 Antigen tests are performed by a fully automated tester using a saliva sample. (Same as the test method adopted for quarantine upon entry to the country.) A certificate of negative test results will be issued to those who test negative.

About Peach (www.flypeach.com/en)

Peach began operating out of Kansai Airport in March 2012. Peach currently services 26 domestic and 17 international routes with 32 aircraft from its hubs: New-Chitose Airport, Sendai Airport, Narita Airport, Fukuoka Airport and Naha Airport in addition to Kansai Airport. From Dec. 24, Peach will start operating new routes from Chubu Airport, Sapporo (New-Chitose) / Sendai-Nagoya (Chubu) and make Chubu Airport its new hub. From Oct.25, Peach will restart international flights connecting Osaka (Kansai) / Tokyo (Narita) / Tokyo (Haneda)-Taipei (Taoyuan). Aiming to become the leading LCC in Asia, we are expanding our route network from various regions, mainly in the Tokyo metropolitan area and Kansai. Also, we moved our boarding terminal at Narita Airport from Terminal 3 to Terminal 1. Boarding procedures are made at check-in counter on the first floor of the South Wing for domestic flights and the B counter on the fourth floor of the North Wing for international flights. When flying Peach for international flights at Kansai Airport, boarding procedures are made at the Terminal 2, and passengers are arrived at Terminal 1.
