Peach Starts Operating its Aircraft with Latest Airbus Cabin "Airspace"

**- Enhancing cabin functionality and comfort, further improving the passenger
experience and overall cabin quality -**

Osaka, March 30, 2026 - Peach Aviation Limited ("Peach"; Representative Director and CEO: Kazunari Ohashi) will begin operating the new Airbus A320neo aircraft (Registration: JA217P), acquired on March 23, 2026, with Airbus's latest cabin "Airspace". *1

Since 2023, Peach has been thoroughly analyzing the entire customer travel process and working to improve quality to ensure that customers can enjoy its services with peace of mind and comfort at every touchpoint. As part of these efforts, we have decided to introduce Airbus's latest cabin concept, "Airspace," to maximize the use of limited cabin space and provide a higher-quality travel experience.

The "Airspace" cabin introduced at this time features the "Airspace XL Bin" storage, which has 60% more capacity, and "full LED lighting" that is optimized for different scenes. By redesigning the storage bins, we reduce the burden of stowing carry-on luggage and support smoother passenger flow onboard. This helps alleviate congestion during boarding and deplaning, maintains on-time performance, and provides passengers with a sense of psychological comfort and a pleasant cabin environment.

The "full LED lighting" provides two patterns of lighting effects depending on the scene, such as during boarding, deplaning, and in-flight service. With bright, warm lighting that allows for enjoyable changes within a calm atmosphere, we have created a highly comfortable cabin space. The seats feature ergonomically designed, pre-reclining seats manufactured by RECARO. Improvements to the backrest efficiently maximize legroom, and the seat upholstery uses next-generation materials that achieve a high-quality, genuine leather-like texture while minimizing environmental impact. Combining RECARO's signature durability and comfort, these seats deliver an eco-friendly and pleasant in-flight experience.

Furthermore, for the first time in Peach's Airbus A320neo, the seats are fully equipped with USB Type-A and Type-C power ports, an update that caters to modern travel styles.

On April 1, flight MM105 will be the first trip for the new aircraft (JA217P) with the Airspace cabin, departing Osaka (Kansai) at 8:40 a.m. and arriving in Sapporo (New Chitose) at 10:40 a.m.*¹ To commemorate the launch of this aircraft, customers who board JA217P will receive commemorative stickers on board.*²

For details on the in-flight facilities, please see the next section.

Under its vision of "A flight full of respect for everyone.," Peach will continue to strive for further quality improvement to deliver a safe and comfortable journey to all customers through initiatives to enhance the in-flight environment, including the newly introduced Airspace.

*¹ The start date of operation may change depending on the operational status.

*² Due to limited quantities, this offer will end once supplies run out. Also, distribution may be suspended depending on the flight conditions, etc.

<About the Airspace facilities>

*Scheduled to be released on April 1.

Aircraft: Airbus A320neo (Aircraft Registration: JA217P)

Operational start date: April 1 (subject to change depending on the flight conditions)

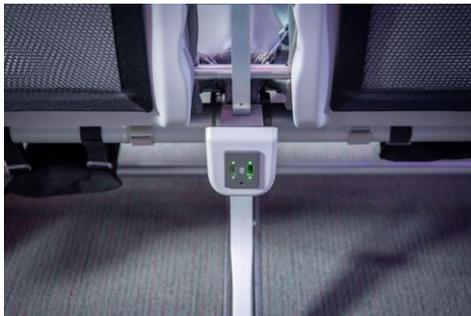

Full LED lighting

This provides two patterns of lighting effects depending on the scene, such as during boarding, deplaning, and in-flight service.

Airspace XL Bin

Overhead storage capacity has increased by 60%.

USB ports (Type-A & Type-C)

USB ports that are compatible with a wide range of devices can be used from any seat, whether it's a window, middle, or aisle. You can enjoy your flight without worrying about your smartphone or tablet running out of battery.

Feature pre-reclined seats ergonomically designed and manufactured by RECARO

By improving the seat back, we've efficiently secured more space around the knees. The seat material uses a next-generation fabric that reduces environmental impact while delivering a premium, leather-like texture.

A warm cabin space

To give you a sense of warmth from the moment you enter the cabin, we have chosen a wood-grain finish for the entrance floor. The entire cabin is unified with non-oppressive white and calming gray, and the warm pink that is characteristic of Peach is subtly used in the seat stitching and carpet, creating a simple yet warm cabin space.

The soft-stitched seat design creates a refined and welcoming atmosphere on board

Adding a touch of warmth to flights. New seats feature elegant pink stitching on a gray base, carefully designed to harmonize with the patterns on the carpet. It is a space that balances Peach's signature playfulness with a gentle, welcoming feel

About Peach (www.flypeach.com/en)

Peach is based at six airports: New Chitose, Narita, Chubu, Kansai, Fukuoka, and Naha, and services 25 domestic routes and 15 international routes. In addition, from April 10, 2025, the Osaka (Kansai) and Nagoya (Chubu) – Seoul (Gimpo) routes will inaugurate service, further enhancing the international route network. Peach will increase the number of flights on the Osaka route starting February 2026, operating up to 8 round-trip flights per day between Osaka (Kansai) - Seoul (Gimpo / Incheon). In addition, from January 1, 2026, the Tokyo (Narita) – Taipei (Taoyuan) route will increase the number of flights to 3 round-trip flights per day, further expanding travel options. We will continue to prioritize safety and pursue fundamental quality, aiming to be an airline loved by even more customers.
