- **Peach's first medium-haul international flight operated with spacious Airbus A321LR**
- **Fares start at 11,280 yen one-way, tickets go on sale at 4:00 p.m. on October 6th**

Osaka, October 6, 2022 Peach Aviation Limited (hereinafter referred to as Peach, CEO: Takeaki Mori) announced that it will launch a new service between Osaka (Kansai) and Bangkok (Suvarnabhumi) on December 27th. Tickets go on sale today at 4 p.m.

A321LR (Introduced from October 28, 2021)

The Osaka (Kansai)-Bangkok (Suvarnabhumi) route is the first new international route in about three years, and as Peach's first medium-haul international route, it will be operated by the Airbus A321LR, designed with a wider seat pitch than the conventional Airbus A320ceo. Fares start at 11,280 yen one-way, and the flights will operate six times a week from December 27th.

Airbus A321LR, which boasts a wide seat pitch of 30 to 32 inches (Approx. 76-81cm), which is on par with full-service carriers, allows you to relax during the approximately 6.5-hour flight between Kansai and Suvarnabhumi. Each seat is equipped with a USB port for charging, and you can enjoy video content with the in-flight digital service, so you can spend a comfortable time in the sky.

About the launch of this service, CEO Mori commented: “This is the middle-haul international route that everyone has been waiting for! With the introduction of the new Airbus A321LR, we were able to open the Osaka-Bangkok route. This is the first route operated by a Japanese LCC, making Kansai and Thailand closer. There are many ways to enjoy Thailand, such as visiting temples, enjoying interaction with local people at night markets, and taking your trip a bit further to relax on the beach. By all means, get out of Japan and go out to find the charm that you can only experience in real life. In addition, for many Thai people, Japan is an attractive destination that “they would like to visit,” and the Kansai area is always ranked among the top tourist destinations. Since the flight from Bangkok departs late at night and arrives early in the morning, we would like you to feel free to come to Japan with Peach after work. and enjoy your Kansai tour to the fullest from the morning.”

Peach, which celebrated its 10th anniversary this year, will begin a new chapter in its history with the launch of new medium-haul international route. By expanding our air network, we will create and deepen new encounters and connections in Asia, thereby contributing to the increase in the intellectual population and the development of the regional economy.

Seat pitch of the seat in the photo is 31 inches (approx. 78.7 cm)

USB port for charging

About Airbus A321LR introduced by Peach

The seat pitch is 30 to 32 inches (approx. 76-81cm) and has increased comfort on board such as equipping each seat with a USB port for charging. Airbus aircraft has seats 1 inch (about 2.5cm) wider than competitors' aircraft, providing ample cabin space. It has a cruising range of 7,400km, and uses CFM's LEAP-1A engine and sharklets (large wing tip plates), achieving an approximately 20% improvement in fuel efficiency compared to the conventional aircraft (A320ceo).

About Peach (www.flypeach.com)

Peach began its operation in March 2012, based in Kansai International Airport. With seven hub airports in New-Chitose, Sendai, Narita, Chubu, Kansai, Fukuoka and Naha, Peach operates 33 domestic routes and 17 international routes with fleet of 34 aircraft. On March 1, 2022, Peach celebrated the 10th anniversary of its operation.
